Issue Type <sup>\*</sup>

 Story 

# User story

As a < type of user >,  
I want < some goal >  
so that < some reason >.

# User story examples

As a web developer, I want to be able to add users to Jira so that my coworkers can report bugs.

# User story examples

As a driver, I want my car's dashboard to be voice activated so that I can get directions safely while driving.

# User story examples

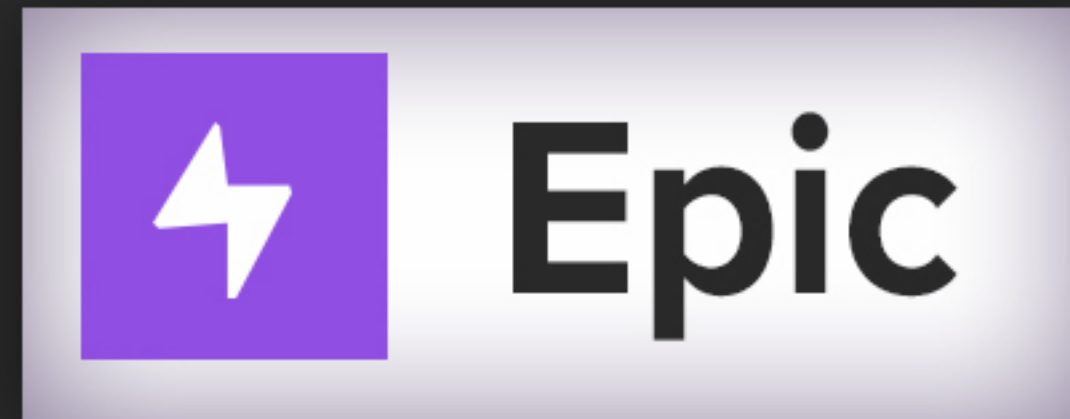

As a cashier, I want to have the total calculated for me so that I can give the correct change back to the customer.

# Epic

An epic is a story that is too big for a single sprint. It's broken down into multiple user stories. When those are done, the epic is complete.

# Epic and story hierarchy

# Epic example

## Epic

Android Auto and Apple CarPlay functionality for our app

## Story

As a **driver**, I want the app to be voice activated so that I can start playing music safely while driving.

## Story

As a **user**, I want playlists for my music so that I can queue up music for my next drive.

## Story

As a **user**, I want to sync the music from my desktop computer with the app so that I have access to music I've already purchased.

**Stories in Jira = User stories**

**Epics in Jira are parent  
to multiple user stories**
